How OpCon Makes Fiserv DNA Banks More Agile and Competitive

OPCON

Find out why so many financial institutions pair their Fiserv DNA core with OpCon.

What is OpCon?

OpCon is a powerful, scalable, and easy-to-use workload automation and orchestration platform.

What You Can Do With OpCon

- Orchestrate your organization's data seamlessly
- Automate disaster recovery procedures
- Send, retrieve, and process daily files to and from The Fed and third-party vendors
- Automate payment processing, loan origination and servicing, and more
- Streamline critical processes within and outside your Fiserv DNA core

The Benefits Of OpCon

- Elevate your customer experience
- Streamline or entirely eliminate manual tasks
- Get time back to focus on strategic initiatives that keep your business competitive
- Enable smart scaling of your business without adding headcount
- Boost employee productivity, morale, and efficiency
- Reduce processing errors, and minimize costly outages and downtime in a crisis

Trusted by 700+ Financial Institutions

"It became apparent very quickly that [OpCon] through a single pane, if you will, could explain everything it's doing across multiple operating systems, different programming languages, and different departments."

David Buggeln, Director of Information Systems at Frandsen Bank & Trust
