

SMA Technologies is excited to announce OpCon Cloud, our upcoming SaaS option for new and existing clients.

Why choose OpCon Cloud? Simply put, it's simpler to manage operations, maintenance, testing, and upgrades.

- No installation required
- No hardware to maintain
- No servers to manage
- No updates to stay on top of

The business continuity and disaster recovery capabilities are game-changing. You are already outsourcing critical systems and services, ensure your business continuity plan is complete by also outsourcing your automation capabilities to the cloud:

- Resilient, "always up" infrastructure thanks to cloud redundancy
- Low maintenance, inherent knowledge repository
- Compatible with your existing systems whether they're on prem, cloud or SaaS – all you need is an API

Why you will love OpCon Cloud

- Get up and running fast
- Remove the headaches of administration
- Ensure your automation initiatives keep moving with 20 hours of consulting from SMA's automation experts each month

Get started early. Contact your account representative and schedule a conversation to lay the groundwork for your conversion to the cloud.
