

Global Insurer

Reducing cost by replacing multiple tools and simplifying operations with OpCon™

Conversions for One of Forbes Top 150 World's Largest Companies

At one of the world's largest insurance companies, SMA Technologies successfully replaced BMC Control-M and IBM® Tivoli® Workload Scheduler (TWS) (both for mainframe and for distributed) with SMA Technologies' flagship product, OpCon. This reduced the insurance company's total cost of ownership (TCO) for process automation by 50 percent.

This client's IT staff was also relieved of the burden of maintaining four different production environments, thus reducing complexity and improving integration between different platforms and applications. All automation processes within the client's two data centers are now managed from one single point-of-control using OpCon, giving this client a single view of their entire enterprise.

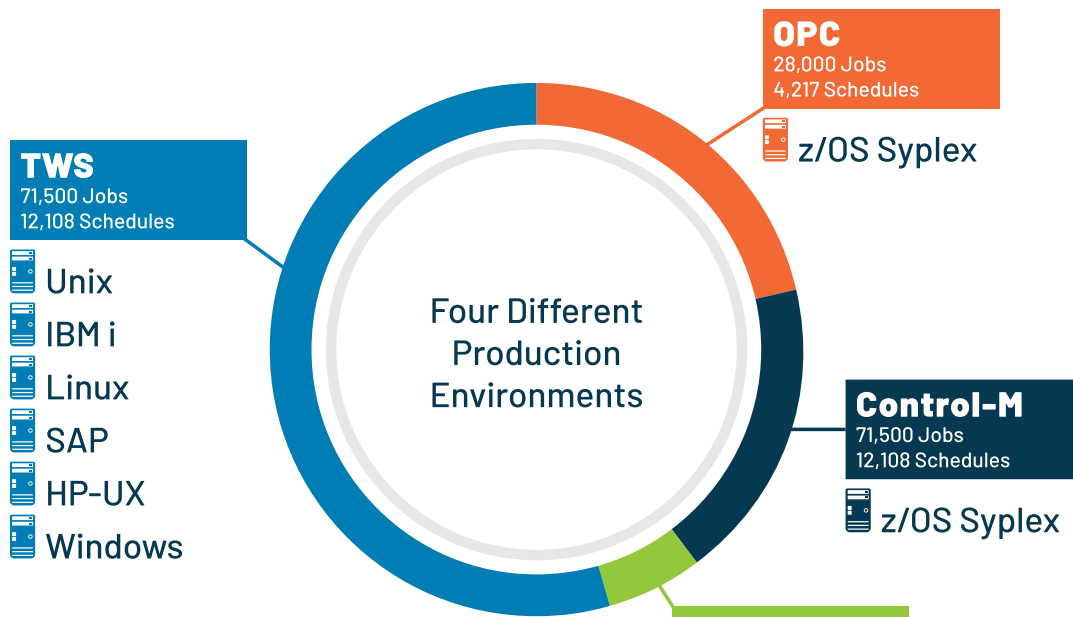

A worldwide insurer serving 65 million customers, operating in more than 100 countries. According to Forbes, it is one of the world's 150 largest companies.

- IBMz, IBMi, Unix, Windows & SAP
- 1,000 IT staff members
- Over 80,000 jobs executed per day
- More than 20,000 schedules
- 5,000 servers (90% virtual)
- 1,000 applications

CHALLENGE	SOLUTION	BENEFITS
High TCO due to usage of multiple tools.	OpCon is a single point-of control.	TCO for process automation was reduced by 50 percent.
Multiple tools required multiple experts.	OpCon training enabled all users to be experts.	No longer dependent on multiple experts to run operations.
High level of complexity between different platforms and scheduling tools.	OpCon automated all platforms and applications from one point-of-control.	Reduced complexity and improved integration between platforms and datacenter.

“OpCon was the only solution in the market that could automate our environment.”
