What You Can Do With OpCon

OPCON

Overview

As a cross-platform and cross-application IT solution, OpCon integrates and automates your business, giving you a single point-of-control. With OpCon, you can eliminate manual tasks and manage workloads across business-critical operations to help you and your staff save time and money, reduce risk, enhance operational efficiency, and improve customer service.

How Can You Accelerate Your Digital Transformation and Business Growth with OpCon

Core Processing/ERP
Orchestrate critical operational processes inside and outside your core/ERP across disparate business systems and applications.

Disaster Recovery and Business Continuity
Enable self-healing routines to keep operations running during unplanned system interruptions or outage.

BI and Date Warehousing
Manage ELT processes in a repeatable way to ensure data is processed and analyzed efficiently and accurately.

Infrastructure Management
Manage siloed technologies from legacy systems to cloud, virtualization, and IoT.

Security and Compliance
Manage role-based privileges and automatically log all actions to meet compliance requirements.

IT Processes
Automate repetitive IT tasks such as the provisioning and deployment of new systems, monitoring and maintenance of existing systems, and reporting and analysis of data.

Automate document imaging and storage

Store custom scripts and manage versioning

Manage cross-platform processes

Event-driven job scheduling

Audits and logs

70+ integrations

Self-service buttons for OpCon admins or staff in other business units

Automate system updates

The Price of Not Automating

The sooner you start automating with OpCon, the faster you can see savings and get time back. The return on investment begins almost immediately. Implementing OpCon shortens the list of processes your staff must do and converts your IT center from a cost center to an ROI machine.

Hundreds of financial institutions are saving over $375,000 on average every year by using OpCon to its full potential across their organization*. There's no limit to how much time and effort you can save other departments and yours with OpCon.

*Based on conservative internal calculations by SMA Technologies for OpCon customers that automate at a pace of 105 seconds per task (i.e., 30 seconds to key a manual task, 60-second wait time between tasks, and 15 seconds to verify successful completion of the previous task) at a rate of $34.85 per hour (i.e., average hourly rate for a full-time employee assuming no premium pay for overtime, holidays, nights, or weekends). These calculations don't include any expenses for errors, re-processing, or other manual operations-related items.
