

How OpCon Makes Insurance Companies More Agile and Efficient

Find out why so many insurers orchestrate their workflows with OpCon.

What is OpCon?

OpCon is a powerful, scalable, and easy-to-use workload automation and orchestration platform.

What You Can Do With OpCon

Manage and orchestrate your policy, billing, and claims data that's housed within disparate, complex, and aging systems across your organization

Execute file transfers, enable automated self-service workflows, and monitor your entire system from a single interface

Automate disaster recovery procedures

Accelerate your digital transformation efforts by removing IT complexity and enhancing security and governance

“OpCon is one of the most important pieces of software we have.”

Kim Mehlhaff, IS Operations Manager at Noridian Mutual Insurance

Key OpCon Capabilities

- 1 Automate batch programs through jobs/tasks
- 2 Run jobs/tasks on modern and legacy platforms
- 3 Leverage a built-in repository for existing scripts
- 4 Employ self-service options for those outside of IT
- 5 Set up notifications based on exceptions in processing
- 6 Automate jobs to run using event-driven conditions
- 7 Organize jobs into workflows with a dependency chain
- 8 Extract data and move to third-party apps or external vendors
- 9 Pass dynamic variables in place of batch program parameters

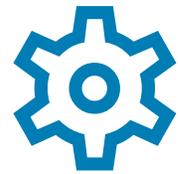

The Benefits Of OpCon

Get time back to focus on strategic initiatives that keep your business competitive

Boost employee productivity, morale, and efficiency

Streamline or entirely eliminate manual tasks

Elevate your customer experience

Enable smart scaling of your business without adding headcount

Reduce processing errors, and minimize costly outages and downtime in a crisis
